Boil Water Advisory Rescinded for the City of Syracuse, Hamilton County

TOPEKA – The Kansas Department of Health and Environment (KDHE) has rescinded a boil water advisory for the City of Syracuse water supply system, located in Hamilton County. The advisory was issued because of a loss of pressure due to maintenance in the distribution system and affected customers located South of the railroad tracks and East of Highway 27.

Public water suppliers in Kansas take all measures necessary to notify customers quickly after a system failure or shutdown. Regardless of whether it's the supplier or KDHE that announces a boil water advisory, KDHE will issue the rescind order following testing at a certified laboratory.

Laboratory testing samples collected from the City of Syracuse indicate no evidence of bacteriological contamination and all other conditions that placed the system at risk of contamination are deemed by KDHE officials to be resolved.

For consumer questions, please contact the water system or you may call KDHE at 785-296-5514. For consumer information please visit KDHE's PWS Consumer Information webpage:
