

**LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION  
MANDATORY LANGUAGE - TIER III**

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

**City of Wells** has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During June-September 2020 we did monitor or test for Lead & Copper and therefore can be sure of the quality of your drinking water during that time.*

The table below lists the contaminant(s) we did properly test for during the last year, how often we are supposed to sample for Lead & Copper, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were taken if any.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
<i>Lead and copper tap water sampling</i>				
<i>Lead and Copper entry point sampling</i>				
<i>Water quality parameters</i>				

**What is being done?**

We have correct the problem with filing the correct samples. For more information, please contact Melanie Williamson-Pounds at (936) 867-4615 or PO Box 20 Wells, Texas 75976.
