

# COVID-19 Vaccine Information

We understand that some people may be nervous about the COVID-19 vaccines; this is totally reasonable. Fortunately, researchers have been working on vaccines for the coronavirus family for years, so they did not have to start from scratch.

As researchers have been working intensely to develop and test the vaccine; they have been transparent in sharing data, holding live hearings, and pausing trials when it's been important to slow down. All of this has given us trust and confidence in vaccination; a critical tool in our toolbox in slowing the spread of COVID-19, and helping our communities move forward.

We have sacrificed so much this year to keep our loved ones and community safe. While we know getting vaccinated is not always comfortable, you can play big role to support your community by keeping yourself and your family up-to-date on vaccinations. By staying updated on immunizations , we can make sure our sacrifice & efforts to fight COVID-19 keep everyone safe.

***Please stay informed for yourself, friends, and loved ones on important developments in COVID-19 response.***
