## **FOR IMMEDIATE RELEASE**

Date: April 29, 2024

### **BOIL ADVISORY ISSUED FOR THE TOWN OF PLAIN DEALING WATER SYSTEM**

The Town of Plain Dealing has issued a boil advisory for their entire water system. The advisory is for all Plain Dealing water customers.

The backup power supply failed to kick on during the strong storm in the early morning hours. This left critical water treatment infrastructure without power, thus rendering them inoperable. The backup power service company along with the main power providers have been notified, and repair efforts have been coordinated.

The advisory is a precautionary measure and Plain Dealing recommends water customers boil their water for one (1) minute before consuming it until the advisory is rescinded. The advisory pertains only to water used for consumption. Again, the advisory is a precautionary measure and not a boil order.

Water customers will be notified when the advisory is rescinded.
