

The following Non-Standard Service Application, supporting documents and fees must be submitted to:

**Dunaway
118 McKinney St.
Farmersville, TX 75442**

(972) 784-7777

Email: Shelby.Smith@dunaway.com

A Non-Standard Water Service Investigation is an engineer's study recommending what upgrades are needed if any upgrades are needed, to provide adequate capacity for your water service request. These recommendations follow the district's policies and standards. Our team does not determine the number of lots/meters the system can accommodate; please specify the number of lots you would like the study to address on the application provided. This is not an on-site investigation—our engineers complete the study remotely using system maps, records, and other digital tools.

Attached are the following documents for your review and completion:

- [Application for Non-Standard Water Service Investigation](#)
- [Card Authorization Form](#)
- [Non-Standard Water Service Investigation FAQs](#).

Complete the application and return it along with the required fee payment. The fee schedule can be found on page 2 of the application. Please refer to the FAQ if you have more questions after completing the Application.

Please attach a copy of the plat, property survey, and/or a vicinity map (a vicinity map, is a map that shows the location of a specific site in relation to its surrounding area, including nearby landmarks, roads, and other relevant features). If you have a proposed lot layout that would be helpful as well. A vicinity map can be found on the County's CAD Website.

You may return the completed application and supporting documents via email (PDF format preferred). If a photo is your only option, that is acceptable—just ensure the image is clear and legible. Alternatively, you may mail the materials to our office at:

DUNAWAY ASSOCIATES

Attn: Shelby Smith

PO Box 606

Farmersville, TX 75442

Business Hours: Monday–Thursday, 8:00 AM–4:00 PM; Friday 8:00 AM – 12:00PM

Please note:

- We offer the option to pay by credit card. A 3% processing fee applies to credit cards. If using a debit card, fee does not apply. The authorization form is attached for your convenience.
- Water studies currently take approximately 6–8 weeks to complete due to a high volume of requests. Larger-scale projects may require more time.
- Our review process operates on a first-come, first-served basis; unfortunately, we cannot expedite requests.
- Once the engineering evaluation is complete, it will be submitted to the listed water entity for approval. After approval, we will send the finalized evaluation to the email provided on the application.

Please be aware that we are unable to provide status updates during the evaluation process. Updates will only be available once the study has been completed and approved.

INITIAL NON-STANDARD WATER SERVICE INVESTIGATION REQUEST

<u>Water Company:</u>	
<u>Development Name:</u> (If applicable)	
<u>Applicant Name:</u> (if you are the real estate agent, engineer, or etc., please put the buyer/seller name that is needing this request, then put your name and title after)	
<u>Mailing Address:</u>	
<u>Applicant Phone Number:</u>	
<u>Applicant Email:</u> (Evaluation will be emailed to this email address, if there is more than one that would like to receive it, please list all email address)	
<u>Property Location:</u> (Address)	
<u>Property ID Number & County</u> (Both Required):	
<u>Number of acres:</u>	
<u>Number of proposed lots</u> (Required):	
<u>Number of Meters Being Requested</u> (Required):	
<u>Fire Flow Requirements:</u> (if applicable, check with your county, we will not provide information, if you do not fill this in)	
<u>Please provide a brief summary of the intended use of the property</u> (e.g., Single Family, Commercial, Multi-Family, RV Park, etc.). If additional space is needed, you may attach a separate letter or document.	
<u>Number of proposed Phases.</u> (If applicable) List each phase with proposed date(s):	

Please attach a copy of the plat, property survey, and/or a vicinity map(a vicinity map, is a map that shows the location of a specific site in relation to its surrounding area, including nearby landmarks, roads, and other relevant features). If you have a proposed lot layout that would be helpful as well. A vicinity map can be found on the County's CAD Website.

You can email application and map/lot layout to Shelby.Smith@dunaway.com

Dunaway

118 MCKINNEY STREET | PO BOX 606 | FARMERSVILLE, TEXAS 75442

OFFICE 972-784-7777 |

WWW.DUNAWAY.COM FIRM REGISTRATION NO F-1114

Note: Must attach vicinity map and proposed lot layout.

Please mail the check for your applicable fee(s) to the address below. PLEASE
MAKE CHECKS PAYABLE TO: DUNAWAY

Note: The fees for this initial analysis are non-refundable.

Dunaway
Attn: Shelby Smith
PO Box 606
Farmersville, TX 75442

We do accept credit card payments. Please note an additional credit card processing fee will apply on credit card payments, does not apply to debit card payments (see table below).

Fee Schedule:

Number of Lots	Initial Fee	Credit Card Processing Fee if Paying by Card (not applicable on, debit cards, check, or cash payments)
1-99	\$1,000.00	\$30.00
100-199	\$1,750.00	\$52.50
200-499	\$2,750.00	\$82.50
500 or Greater	TBD	N/A

PLEASE READ THE FOLLOWING BEFORE SIGNING AND SUBMITTING APPLICATION

- The applicable fee, from the table above, specifically covers only the initial evaluation, initial waterline exhibit, and initial cost estimate of opinion.
- All provided recommendations (evaluation letters) are final and will not be altered.
- If the scope of the initial request changes, then a new evaluation will be required, and a new evaluation fee will apply.
- Any questions/concerns from the applicant regarding the water study results and all future correspondence shall be directed to the Water District.
- I understand that the water study does not constitute a contract between the applicant and the engineer. The water request study is being performed on behalf of the water provider.
- Once your application is in our queue, we are unable to provide status updates. Therefore, there's no need to email or call for updates. If more than 8 weeks have passed since your submission date, you may follow up at that time. Please note that holidays are not included in the 8-week timeline, so if a holiday falls near the 8-week mark, processing may extend until after the holiday.

Please sign below to acknowledge this form and all the information contained there-in.

Signature of Applicant

Date Signed

Please note: Water investigation studies typically take 6–8 weeks to complete, though larger or more complex studies may require additional time. Once the study is complete, it is submitted to the water provider for review and approval. Results cannot be released to the applicant until approval is received from the water provider..

You can email application and map/lot layout to Shelby.Smith@dunaway.com

Non-Standard Water Request FAQ

Q Why is an evaluation needed?

A Your new service request is considered a non-standard service request. An evaluation is needed to determine what is required to service the requested meters.

The following are common examples of non-standard service requests (but not limited to these examples):

- Requests for additional meters on property that is being subdivided
 - If more than one meter is being requested for a single piece of property
 - Requests for meter sizes above the standard 5/8" x 3/4" meter
 - Properties that do not have existing on-site waterlines
 - Properties where the waterline or water infrastructure is deemed to be at or near capacity
-

Q What happens next?

A A water study will need to be conducted with the Water Utility Provider's Engineer, Dunaway Associates, LLC. Please contact the engineer's office at 972-784-7777.

The engineering office will provide a water study application form and will provide applicable fees for the study.

Once the application has been received and applicable fees have been paid, the water study application will go into the engineering queue. Once the request is complete, an evaluation letter will be provided to the applicant, along with a waterline exhibit.

Q What is the average turnaround for a water study?

A Water studies take on average 8 weeks to complete. The water utility provider must review and approve the water study before it is provided to the applicant.

Q What is provided with the water study?

- A**
- An evaluation letter will be provided. This letter advises if any modifications are needed to the water system to serve the requested meters. If modifications are needed, a summary of improvements will be provided.
 - An improvement exhibit will be provided as well. It provides a visual of what the evaluation letter is explaining from a map view.
 - An opinion of probable construction costs (OPCC) for necessary improvements may be provided, upon request, as part of the initial application fee. Note: This is just an estimate of opinion based on recent similar projects and current market conditions. Actual bids or pricing from contractors may come in higher or lower than the estimate.
-

Q What happens after I receive the water evaluation results?

- A**
- If the evaluation letter did not advise that system improvements are needed, then contact the water utility provider to request a meter and pay applicable fees provided by the district.
 - If the evaluation letter advised that water system improvements are needed, and you are interested in proceeding with construction, then the following should occur:
 - Please advise the engineer's office that you would like an opinion of probable construction costs (OPCC), if one has not yet been provided, to determine potential costs.
 - After receiving the OPCC, if you wish to proceed with construction, notify the district to request next steps. Depending on the project scope, you may be referred to the district engineer's office to complete the design work and bidding process.
-

Q What if I have questions or concerns regarding the evaluation results?

- A**
- You may bring your questions or concerns to the water utility provider's attention. Please note that the water evaluation recommendations are in accordance with the water utility provider's standard requirements and the Texas Commission on Environmental Quality minimum requirements for water pressure and flow capacities. In most cases, no changes to the evaluation can be made as it could be to the detriment to the existing water system.
-

CASH SPECIAL UTILITY DISTRICT

172 FM 1564 EAST

GREENVILLE, TEXAS 75402

PHONE: (903)883-2695 EMAIL: INFO@CASHWATER.ORG

A Message to Non-Standard Service Applicants:

Over the years, Hunt and the adjacent counties have grown to serve expanding residential, commercial, and industrial interest. As any area grows, residential and small commercial interest quickly move into the surrounding rural areas seeking a small community atmosphere and better quality of life. This movement to rural areas has created a need for the services of rural utilities like The Cash Special Utility District. Our District proudly serves thousands of rural water utility customers with excellent service and surpasses all regulatory requirements. Cash SUD welcomes all service applicants and looks forward to remaining a stable force in meeting future growth and development needs.

While Cash SUD supports growth and development of the rural community, it must also serve the interests of its customers. Cash SUD's mission is to provide the very best water utility service at the lowest possible cost to the consumer. Planned growth and development can serve to meet the needs of both the community and the goals of the utility. In an effort to meet these needs, the Cash SUD Board of Directors has initiated planning studies of its water system. Continual plans are being made to expand the service capacity of the water system to meet projected growth through the coming years.

Balancing its efforts to meet development needs and regulatory requirements, Cash SUD has also implemented new development policies to ensure fair and equitable development practices. The following package incorporates engineering, policy and financial planning principles essential to the task of managing growth and development.

The Board's philosophy on serving the interest of growth and development is two-fold:

1. The district should pay for providing the "foundation" for system-wide growth through sound planning, design and financial practices. This ensures that the system's infrastructure meets current and future incremental demands for service.
2. Site-specific growth and development should pay its own way in the expansion of the system's infrastructure to meet growth needs. This "growth pays for growth" policy is recognized and accepted by regulatory authorities and industry professionals as the fairest means by which utilities can meet planned development objectives. It truly represents a "cost-based" formula whereby costs are directly related to their origin.

This philosophy is promulgated through the District's policies and procedures.

As you contemplate your planned venture, we look forward to assisting you in meeting your development goals. Our staff and support-group of industry professionals are ready and able to provide you with the information necessary for the successful evaluation of your water service needs. Please review this packet of information and complete and return the application form along with a final plat so that we may begin the process of helping you make your project a success.

The Board of Directors and Management
Cash Special Utility District

NON-STANDARD SERVICE EXTENSION POLICIES SUB-SECTION F

SECTION F: NON-STANDARD SERVICE EXTENSION POLICY

1. **Public Convenience and Necessity.** The Cash Special Utility District (the District) is certificated under Chapter 13, Subchapter G., of the Texas Water Code to provide water service to communities in and/or around Hunt, Hopkins, Rockwall, and Rains Counties, Texas. The District's Certificate of Convenience and Necessity, Service Policy Section D, requires the District to provide continuous and adequate service within these certificated service areas.
2. **Limits of Obligation.** The District shall provide continuous and adequate service within its service areas according to the terms of its Service Policy, the rules and regulations of local, state, and federal jurisdictions, and the covenants of bond obligations, promissory notes, and/or other secured instruments. Specifically, Chapter 13.2502 provides for constructive notice, hereby given, and otherwise provided by the publication of the required, Notice of Requirement to Comply with the Subdivision Service Extension Policy of the Cash Special Utility District@ as evidenced by this document. The District is not required to extend retail water utility service to a service applicant in a subdivision where the responsible party (Applicant/Developer) of the applicable property (subdivision) has failed to comply with the terms of this policy.
3. **Purpose.** The purpose of this Non-Standard Service Extension Policy (also sometimes referred to as the Subdivision Service Extension Policy) is to govern agreements and service procedures for any person(s), partnership, cooperative, corporation, agency, public or private organization of any character or any other legal entity who subdivides land by dividing any lot, tract, or parcel of land, within the service area of the District, into two or more lots or sites, for the purpose of sale or development, whether immediate or future, including re-subdivision of land for which a plat has been filed and recorded, or requests two or more water service connections, or the metering equivalents thereof, on a single contiguous tract of land. Additionally, this policy shall govern any development where additional piping, service facilities, etc. are required to accommodate individual, multiple, commercial, or industrial applicants. For the purposes of this Service Policy, applications subject to this section shall be defined as Non- Standard.

4. **Application of Rules.** The Board of Directors of the District shall interpret on an individual basis whether or not the applicant complies with the terms of this policy and whether the applicant's service request shall be subject to all or part of the conditions of this section.
5. **Non- Standard Service Application.** The applicant shall meet the following requirements prior to the initiation of a service contract by the District:
- a. The applicant shall submit a properly completed Non-Standard Service Application to the District.
 - b. A final plat approved by the appropriate governmental entities, and acceptable to the District, must accompany the application showing the applicant's requested service area. The plat must be approved by all regulatory authorities and local governments having jurisdiction over lot sizes, sewage control, drainage, right-of-way, and other service facilities. Plans, specifications, and special requirements of such regulatory authorities shall be submitted with the plat. If no local governmental authorities have requirements other than those of the District, the applicant shall supply a plat drawn by a registered public surveyor or professional engineer. The plat shall include all previous subdivisions of the property and existing tract owners of record. The plat must distinguish the tracts for which service is currently being requested, and as much as practicable, show future subdivision of larger tracts. Such plats must be filed as a part of the property deed with the appropriate county clerk's office. Applicants for single taps involving extension or up-sizing of facilities shall be required to submit maps or plans detailing the location of the requested extension and details of demand requirements. Other plat requirements are listed in the Non-Standard Service Application form.
 - c. The applicant shall submit the properly completed application and plat. The District shall then provide an estimate of the Non-Standard Service investigation fee. This fee shall represent the estimated cost of initial project management, administrative, legal, and preliminary engineering fees. The actual costs of these services shall be assessed on a project by project basis. Following preliminary project review, any unused portion of the fee shall be refundable to the applicant and any additional expenses incurred as a result of efforts by the District to determine service requirements of the applicant shall be paid by the applicant.
 - d. Immediately following the applicant's satisfactory completion of application requirements, the District may engage the services of a Project Manager to initiate, facilitate, and complete the project under the terms of this policy. The Project Manager shall assist the General Manager of the District by coordinating all project activities on behalf of the District, or as directed by the General Manager. Project management costs shall be included in the total project costs to be paid by the applicant.
 - e. If after the service analysis has been completed, the District determines that the applicant's service request is for property outside the District's Certificated Service Area of Public Convenience and Necessity, service may be extended provided that:
 - 1) The service location is contiguous to or within one- fourth (1/4) mile of the District's Certificated Service Area of Public Convenience and Necessity; or
 - 2) The service location is not in an area receiving similar service from another utility;
 - 3) The service location is not within the Area of Public Convenience and Necessity of another similar utility; and

- 4) The applicant pays the cost of the amendment to the District's Certificated Area to include the area to be served.

6. **Design.** The District shall study the design requirements of the applicant's required facilities prior to initiation of a service contract by adopting the following schedule:

- a. The District's consulting engineer shall review the service demand requirements for the applicant's planned facilities and prepare a preliminary engineering report for the District. The preliminary engineering report shall address on-site and off-site facilities required to meet service requirements of the applicant, and capacity impacts on existing facilities. The applicant may hire the services of a Texas Registered Professional Engineer for all design of on-site service facilities. The District's engineer shall then design all off-site facilities and review and approve all plans and specifications for other designed on-site facilities. Design standards shall comply with the District's design specifications.
- b. Engineering fees for completion of the project shall follow the District's Consulting Engineer's fee schedule. Fee scheduling shall be based on the consultant's hourly rates, the work demands of the specific project, and, in general, the published fee curves of The Consulting Engineers Council of Texas. These fees shall be in addition to the preliminary engineering report completed as a part of the Non-Standard Service Investigation Fee and any fees for engineering services hired outside the District engineer's work.
- c. Upon review and approval of the preliminary cost estimates by the applicant, the Consulting Engineer shall compile and submit to the District a set of detailed plans, specifications, and prepare bid documents for the project as directed by the project manager and/or the District.
- d. If no local authority imposes other design criteria on the applicant's service request, the District's Engineer shall design facilities to meet the service demands subject to the following terms and conditions.
 - 1) If the plat submitted is approved by the applicable county commissioner's court, and/or by a municipal government having authority for plat approval, then service will be designed according to the number of lots or service units as indicated by the approved plat.
 - 2) If the plat submitted is not approved by the applicable authorities, the District shall impose specific design criteria for service on the potential number of services, platted or not platted as lots or service units, for which service may be ultimately requested in the unapproved plat of the requested service area. The maximum number of lots or service units may be determined by the total acreage divided by the minimum lot size allowed by the county for installation of on-site sewage facilities. The District may allow for a percentage of total potential build-out.
 - 3) Fire flow design demands will be determined on a case by case basis. All development under the jurisdiction of another authority other than the District will have to meet the standards of that authority. Developments under no authority in rural areas, wanting to provide fire flow, will be required to follow the requirements specified in appendix "A" of this section.

7. **Cost of Service.** Unit cost of service to Non-Standard Service applicants is often inconsistent with the per-unit costs assessed Standard Service applicants. The cost-of-service calculations for Standard Service is based on a uniform system capacity analysis and other factors unique to individual service requirements, including amortized participation of meeting capacity costs through monthly rates. Non-

Standard service costs are based more on site-specific capacity analysis due to the development's significant impact on capacity in its pressure plane and based on other factors unique to non-standard service requirements, including the requirement for up-front participation in meeting capacity requirements for their development. Costs to the Non-Standard Service applicant shall be directly related to the fair and reasonable costs of providing service to meet the known and measurable demand of the proposed project for approved, platted developments in its respective pressure plane. Reasonable projections shall also be made by the District to anticipate additional service demands in unapproved, un-platted developments that may result in further subdivision of tracts within the boundaries of the developed property. Costs of upgrading facilities to meet these costs shall be paid by the applicant.

The District also reserves the right to upgrade design of off-site service facilities in a route to, or in the vicinity of the proposed project, to meet future demands, provided however, that the District pays the expense of such upgrading above the applicant's current or future facility requirements. The District's participation in construction due to an upgrade shall be based on the construction cost difference, not the capacity cost difference, unless however, the District's distribution service capacity demand is at or near 85% of total available capacity at the time the construction is contemplated. Therefore, the District shall only pay the incremental increase in upgrade of material costs unless there are substantial additional costs related to construction of facilities due to the District's need to expand its capacity in the area under the 85% rule. Under such conditions, the District shall allocate costs according to the capacity cost difference.

8. **Non- Standard Service Contract.** All applicants requesting or requiring Non- Standard Service shall enter into a written contract prepared by the District. Said contract shall define the terms of service prior to construction of required service facilities. Guidelines for the service contract may include, but are not limited to:
- a. Definition of all costs associated with required management, administration, design, construction, and inspection of facilities for water service to the applicant's service area and terms by which these costs are to be paid.
 - b. Definition of procedures by which the applicant shall accept or deny a contractor's bid, thereby committing to continue or discontinue the project.
 - c. Definition of fees required by the District in addition to the construction and other costs required under this section.
 - d. Definition of monthly standby fees as applicable to the service request.
 - e. Definition of terms by which reserved service shall be provided to the applicant and duration of reserved service with respect to the impact the applicant's service request will have upon the District's system capability to meet other service requests.
 - f. Definition of terms by which the applicant shall be reimbursed or compensated for fees duplicated in assessments for monthly rates and other fees.
 - g. Definition of terms by which the District shall administer the applicant's project by:
 - 1) Review of the design of the applicant's on-site service facilities;
 - 2) Design of off-site service facilities to provide service to the applicant's facilities;
 - 3) Securing and qualifying bids for off-site facilities, if applicable;
 - 4) Selection of a qualified bidder for construction of off-site facilities;
 - 5) Approval of qualified bidders or candidates for construction of on-site facilities;
 - 6) Execution of the Service Contract;
 - 7) Construction inspection of on and off-site facilities; and

8) Testing of facilities and closing the project.

- h. Definition of terms by which the applicant shall indemnify the District from all third party claims or lawsuits in connection with the project contemplated.
- i. Definition of terms by which the applicant shall deed all constructed facilities to the District and by which the District shall assume operation and maintenance responsibility, including any enforcement of warranties in connection with construction of the applicant's project.
- j. Definition of terms by which the applicant shall grant title or easement for right-of-ways, constructed facilities, and facility sites and/or terms by which the applicant shall provide for the securing of required right-of-ways and sites.
- k. Definition of terms by which the Board of Directors shall review and approve the Service Contract pursuant to current rules, regulations, and by laws.

9. **Property and Right-of-Way Acquisition.** With regard to construction of facilities, the District shall require private right-of-way easements or private property as per the following conditions:

10. **Bids for Construction.** The District's consulting engineer shall advertise for bids for the construction of the applicant's proposed off-site facilities in accordance with generally accepted practices. The applicant's consulting engineer shall advertise for bids for construction of the proposed on-site facilities in accordance with generally accepted practices, or may submit for the District's approval of a qualified candidate for construction without submitting for competitive bidding. Plans and specifications shall be made available, with or without charge, to prospective bidders or candidates. Although the District reserves the right to reject any bid or contractor, the District shall generally provide approval of award to the lowest and best bidder in accordance with the following criteria:

- a. The applicant shall sign the Service Contract noting willingness to proceed with the project and shall pay all costs in advance of off-site construction associated with the project;
- b. The contractor shall provide an adequate bid bond under terms acceptable to the District;
- c. The contractor shall secure adequate performance and payment bonding for the project under terms acceptable to the District;
- d. The contractor shall supply favorable references acceptable to the District;
- e. The contractor shall qualify with the District as competent to complete the work;
- f. The contractor shall provide adequate certificates of insurance as required by the District and the District and its consulting engineer shall be named as co-insured parties with the contractor.

11. **Pre- Payment for Construction and Service.** Upon execution of the Service Contract, the applicant shall pay to the District all costs required under the terms of the contract.

12. Construction.

- a. All road work and site drainage work pursuant to county and/or municipal standards (if applicable) shall be completed prior to facility construction to avoid future problems resulting from road right-of-way completion and excavation. Subject to approval of the requisite authority, road sleeves may be installed prior to road construction to avoid road damage during construction of applicant's facilities.
- b. The District shall, at the expense of the applicant, inspect the facilities to ensure that District standards are achieved.
- c. Construction plans and specifications shall be strictly adhered to, but the District reserves the right to change order any specifications, due to unforeseen circumstances during the design

phase, to better facilitate operation of the applicant's facility. All change order amounts shall be charged to the applicant.

13. Service within Subdivisions. The District's objective to provide service to any customer located within a subdivision governed by this section is strictly limited to the Non-Standard Service specified by the applicant in accordance with the designated lots or service units as a part of the approved plat and specified in the Non-Standard Service Contract. The purchaser of any lots who do not receive service because their service is not consistent with the service contract and paid for by the applicant shall have no recourse to the District but may have recourse to the applicant developer under Texas law, including but not limited to Section 13.257, Texas Water Code, and the Texas Deceptive Trade Practices-Consumer Protection Act, Ch 17, Subchapter E, Business and Commerce Code.

14. Subdivisions Involving 50 Acres or Larger. The applicant developer must provide all information otherwise required under this section and must ensure that the District has been provided complete information sufficient to determine whether the level and manner of service requested by the applicant developer can be provided within the time frame specified by the applicant developer and to determine what capital improvements, including expansion of capacity of the District's production, and distribution facilities properly and directly allocable to the requested level and manner of service will be needed. At a minimum, the applicant developer must provide the following:

- a. Map and description of the area to be served complying with requirements of 30 Texas Administration Code Section 291.105(a) (2) (A)-(G).
- b. Time frame for the initiation of service and service to each phase.
- c. Level of service (quantity and quality) for each phase including a map show each phase.
- d. The projected land uses that support the requested level of service for each phase.
- e. Copies of all required approves, reports and studies done by or for the applicant developer for this property.
- f. Proposed improvements to be constructed by the applicant developer including time line for the construction of these improvements.
- g. A map or plat of the subdivision depicting each phase signed and sealed by a licensed surveyor or registered professional engineer.
- h. Projected water and or wastewater demands of the subdivision when fully built out and the projected schedule of build-out.
- i. Any additional requested information by the District necessary to determine the capacity and the cost for providing the requested service.
- j. The applicant developer must advise the District that he/she may request expedited decertification from the TCEQ.

The application will be processed on a time frame that should ensure final decision by the District within 90 days from the date of the Non-Standard Service Application and the payment of all fees required by this section. Upon payment of all required fees, the District shall review applicant developer's service request. If no additional information is required from the applicant developer, the District will prepare a written report on applicant developer's service request, subject to any final approval by the District's Board of Directors which must be completed within 90 days. The District written report will state whether the requested service will be provided, whether the requested service can be provided within the time frame specified by the applicant developer, and the costs for which the applicant developer will be responsible for paying. In the event the District determines additional information is needed, the District will notify applicant developer of the need for such additional information. Notice for additional

information will be made in writing within 30 days of the date of the District receives the applicant developer's payment and completed application for Non-Standard Service. Applicant developer should respond to the District with additional information within 15 days of the request. In any case the District will provide the written report, including final approval by the District's Board of Directors within 90 days of the initial application and payment of fees. By mutual written agreement, the District and the applicant developer may extend the time for review beyond the 90 days provided for expedited petitions to the TCEQ. The applicant developer is advised that if the applicant developer makes any changes in the level or manner of service and the time frame for initiation of service that is different than the initial application, the original application will be deemed withdrawn and the changes made may be considered a new application for all purposes, including the times specified herein for processing. Following the 90 days and final approval by the District and acceptance of the District's terms for service by the applicant developer, a non-Standard Service Contract will be executed and the District shall provide service according to the terms and conditions within the Non-Standard Service Contract.

15. **Temporary Service.** The classification assigned an applicant that is in the process of construction. This could also apply to service for uses other than permanent (agricultural, road construction, drilling, livestock, etc.). Temporary service shall only be provided for a maximum of 90 days and can only be extended by approval of the General Manager.

APPENDIX A

This appendix is set forth and adopted by the District to meet the growing need to provide fire flow in new subdivisions and developments throughout the District's service area. The District reserves the right to "Re-classify" flows on all fire hydrants within the distribution system including new subdivisions and development as the District adds more connections to the distribution system. All fire hydrants shall, at all times, meet the minimum state standards and the "Re-classification of a fire hydrant shall not constitute a need for off-site improvements by the District.

Design

Design is based on current rural development densities as seen throughout the state.

- 1) 5 acres and larger size lots
6 inch distribution main with fire hydrants (FH) located every 2000 feet. Flow can range from 250 gallon per minutes (gpm) to 500gpm.
 - 2) 2 acre to 5 acre size lots
6 inch distribution main with FHs located every 1000 feet. Flow can range from 500gpm to 750gpm.
 - 3) 1 acre to 2 acre size lots
