

# Dayton Road Construction

On May 22nd, 2025 we were contacted by DC Paving of their intention to start on extensive road work in Dayton for our CCMG Matching Grant. This road work will include milling and paving of streets, some sidewalks, and ADA sidewalk approach ramps. They intend to start concrete work on June 2nd, 2025. This is a full month sooner than was originally expected.

Concrete work will last 6-7 weeks. When the concrete work is completed they will start street milling and paving which is expected to last 7-10 days. If you live on or travel the streets listed below you should expect travel and parking disruptions which we hope to keep to a minimum. We will do our best to keep you informed as to when and how you may be disrupted. All work is weather and situational dependent therefore exact dates at specific locations cannot be fixed at this time. We appreciate your patience and understanding in making Dayton's streets safer and Dayton an even greater place to live.

Effected Roads (not in order of work to be performed):

Shady Lane Court (cul-de-sac)

Shady Lane Place (cul-de-sac)

Ricks Drive

Market Street

Delaware Street

College Street

Main Street (from Washington Street to Delaware Street)

Conjunction Street (from College Street to Cagles Mill Drive)
